MEACH SOKHAI

WEB DEVELOPER

ABOUT ME

Fourth-year Management Information Systems student at SETEC Institute and aspiring web developer, seeking an internship to gain practical experience. I build responsive web applications with React.js, Angular, Bootstrap and Tailwind CSS, backed by Node.js/Express, basic Laravel and MySQL REST APIs. A fast learner who works well in a team.

ACADEMIC EXPERIENCE

Academic Web Development Projects — 2024 – Present
SETEC Institute, Phnom Penh

- Built responsive, user-friendly web interfaces with React.js and Angular, styled with Bootstrap and Tailwind CSS.
- Developed back-end services with Node.js/Express and basic Laravel, designing and consuming REST APIs (HTTP, JSON).
- Worked with MySQL, PostgreSQL and MongoDB to model data and power dashboards and reports.
- Collaborated with teammates on real features, sharing responsibilities and solving technical problems together.
- Used AI tools to speed up development, debug code and learn new technologies faster.

PROJECTS

Online Quiz System — Personal Project

- Online quiz application with a React + TypeScript front-end styled with Tailwind CSS, and a Node.js REST API with MySQL.
- Secure authentication with two roles: Teachers create quizzes and manage questions; Students take quizzes.
- Automatic scoring with instant results and score history for students, and results overview for teachers.

Attendance Management System — Personal Project

- Angular + TypeScript + Bootstrap front-end with a REST API and MySQL integration.
- Role-based access and attendance tracking with reporting features.
- Dashboard with weekly charts (present, absent, permission, late) and totals for teachers, students, classes and subjects.
